## **Project: Afghan street development in Dandenong**

We at DNA completed this project for the Afghan community's new street development in Dandenong. This sculpture was designed by a renowned Afghan architect and it's a symbol of hope and prosperity for the Afghan community.

As you can see from the pictures, the sculpture was quite complex with many parts, the parts had to be sandblasted and washed down before applying multiple coats in three different colours.

It was very satisfying to be invited to the grand opening event and to see our hard work proudly on display.
